Arbor Mobile Reporting allows [Portfolio Management System](#) users to view their real time positions on their mobile phones, tablets and computers, in a daily or MTD mode. The reporting format can also be configured based on the users preference.

Live Updates

Demo (MTD) ▼														
NAV	110,135,055	MTD	3,454,900	3%▲	YTD	3%	Posn(L)	48,563,739	Cash(L)	95,037,152	Exp(L)	63,817,416	Net Exp	19,284,223
Close	109,107,984	Daily	1,027,071	1%▲	QTD	3%	Posn(S)	(31,286,036)	Cash(S)	(2,179,800)	Exp(S)	(44,533,194)	Gross Exp	108,350,610

Information shown on this mobile site will reflect your real-time portfolio as configured on APM. This feature enables you to see your preferred trade and risk information, such as:

- Prices
- Positions
- Cash
- Exposures
- Market Value
- NAV
- P&L
- Price Movements

Additional columns can be managed in our 'ordering' feature and will be discussed further in 'Front End Feature' section.

Live Reporting

In addition to prices, your position will also be reported live – which means new orders (including the ones made in the [Order Management System](#)), changes and amendments in your portfolio or trades can be instantly viewed and audited at fund and position level.

Front End Features

Remembering the size limitations mobile screens may have, we spent extra effort in creating features to enable each user to get the most out of our mobile reporting platform. Some examples of these features are:

- Arithmetic functions
- Column ordering
- Expand or contract header
- Export positions to CSV or PDF files
- Filter
- Group by feature
- Performance attribution
- Pin a column left / right
- Sort ascending / descending

Group By

Due to the limited space in mobile screens, we have selected some columns to appear as default in this reporting platform. Nonetheless, the users are free to check and un-check the check box to display and remove particular column(s). To move columns around, the users can drag and drop a column on top of another, switching their places.

Menu Arbor Financial Systems Settings

Finally, this mobile platform also allows the users to export their real time position information as CSV and PDF files, enabling them to send these files directly to their contacts.

To request a demo of this mobile technology, please contact us at enquiries@arborfs.com.
